

Manjunath R

Senior Staff System Engineer | IBM India Pvt Ltd.

Bengaluru, Karnataka, India | MOBILE: +91 7353448688 | EMAIL: Manjunath777Rgowda@gmail.com

LINKEDIN: <https://www.linkedin.com/in/manjunath-r-236a8b152/>

- Ingenious Software Development Engineer and Senior Staff System Engineer with over 8+ years of experience, specializing in leading teams and designing scalable end-to-end pipelines.
- Proficient in Microservices, Database Management, Problem Solving, and Software Designing.
- Skilled in converting monolithic applications into modern microservices, ensuring reliability, scalability, and robustness.
- Seeking to leverage my knowledge and mentoring experience into a lead engineering role.

EDUCATION

Master of Data Science (Global) | March 2024 – Feb 2025, Deakin University, Australia

Bachelor of Engineering in Computer Science | Aug 2014 – April 2018, Visvesvaraya Technological University

SKILLS

Backend Technology - Java, Python, Spring Boot, Alembic, Keycloak

Machine Learning - SVM, Random Forest, Regression, NLP, Computer Vision

DevOps - Docker, Kubernetes, Jenkins

Operating System – Windows, Centos, Ubuntu, Linux, Rocky Linux

Databases - MySQL, PostgreSQL, MongoDB, Redis, Big Query

Cloud – AWS, Azure and CSP, GCP

Performance and Monitoring – Gray log, Prometheus, Graphana

Project Management - Jira, Zoho

Other Skills – DSA, OOPS, Rest API, IntelliJ, VS code, Maven, Ant, Google Collab, Jupyter Notebook

PROFESSIONAL EXPERIENCE

IBM India Pvt Ltd, Bengaluru, INDIA — *Senior Staff System Engineer* | May 2024 – (present)

Crypto Discovery and Inventory Application

- Led the backend end-to-end design, development, and deployment of the ZCDI application backend, driving technical excellence and scalability.
- Spearheaded the implementation of Keycloak for authentication and authorization, enhancing security and access management.
- Directed the backend team, overseeing architecture decisions, development workflows, and best practices.
- Established and managed Alembic-based database migration strategies, ensuring seamless version control and updates.
- Collaborated with cross-functional teams to define technical solutions, streamline integration, and align business objectives.
- Conducted code reviews, mentored team members, and fostered a high-performance engineering culture.

Backend Test Engine

- Designed and developed a functional test case framework to automate and streamline backend testing.
- Ensured comprehensive test coverage for APIs, database interactions, and key business logic.
- Integrated the framework into CI/CD pipelines for automated regression testing and faster deployments.
- Enabled scalability and reusability with modular test components and parameterized test cases.
- Improved test efficiency and defect detection, reducing manual effort and accelerating release cycles.

Nuvepro Technologies Pvt Ltd, Bengaluru, INDIA — *Principal Software Engineer* | Jan 2021 – April 2024, 3.3 Yrs.

- Led a 5-member team in Middleware development using Java, Postgres, and Cloud solutions.
- Architected Nuvelink V2 (Middleware) with Spring Boot microservices, transforming monolithic applications into modern, scalable microservices.
- Optimized cost calculation for AWS, Azure, and GCP, preventing leakages and increasing revenue with an efficient reporting system.
- Developed a log puller application for cross-microservices log analysis, simplifying troubleshooting and debugging.
- Successfully migrated the production middleware application from Ant to Maven, Postgres 9 to Progress 13, and Java 8 to Java 11.
- Conducted requirement analysis, feasibility studies, and solution architecture alignment across teams.

High Peak Software, Bengaluru, INDIA — *Software Engineer* | July 2018 – Jan 2021, 3.6 Yrs.

- Developed FIU Connect, an integrated platform simplifying access to Multiple Account Aggregator (AA) using Spring Boot and MongoDB.
- Implemented Email Engagement Engine, automating paperwork delivery, tracking responses, and generating daily activity reports, reducing errors, and increasing revenue.
- Engine for parsing invoices from emails, supporting HTML, PDF, Excel, Doc, Images, and email bodies using OCR and Google Vision.
- Campaign Management System allows vendors to create campaigns based on geo-location, specialty, and category using Spring Boot, MySQL, and Redis.

CERTIFICATIONS

- **Postgraduate Degree in Artificial Intelligence and Machine Learning- Online** | Jan 2023 – Dec 2023, Texas McCombs School of Business
- Master Microservices with Spring Boot and Spring Cloud – Udemy Issued My 2022

ACHIEVEMENTS

- Four-Time Employee of the Month | Nuvepro Technologies
 - o Demonstrated consistent excellence and dedication, earning the Employee of the Month recognition four times during my tenure at Nuvepro Technologies.
 - o Recognized for outstanding contributions, leadership, and unwavering commitment to achieving team and organizational goals.

ASK ME ABOUT – Micro Services, Development and Deployment, Cloud Solutions, Rest API integration, NLP, and Computer vision.
