

Manjunath R

Senior Staff Software Engineer | Backend & Distributed Systems

Bengaluru, Karnataka, India | MOBILE: +91 7353448688 | EMAIL: Manjunath777Rgowda@gmail.com

LINKEDIN: <https://www.linkedin.com/in/manjunath-r-236a8b152/>

- Senior Staff Software Engineer with 8+ years of experience designing, developing, and leading scalable backend platforms and distributed systems. Strong expertise in **Java, Spring Boot, microservices, Apache Kafka, REST APIs, cloud platforms, Kubernetes, and relational/NoSQL databases**.
- Experienced in modernizing monolithic applications into scalable microservice architectures, designing asynchronous event-driven systems, and driving end-to-end architecture, development, testing, and deployment.
- Proven technical leadership experience managing engineering teams, mentoring developers, conducting design/code reviews, and collaborating across teams to deliver reliable production systems.

EDUCATION

Master of Data Science (Global) | March 2024 – Feb 2025, Deakin University, Australia

Bachelor of Engineering in Computer Science | Aug 2014 – April 2018, Visvesvaraya Technological University

SKILLS

Languages: Java, Python

Backend & Frameworks: Spring Boot, Microservices, REST APIs, Apache Kafka, Keycloak, Alembic

Architecture: Distributed Systems, Microservices Architecture, Event-Driven Architecture, System Design, API Design

Cloud: AWS, Azure, GCP, IBM Cloud

Containers & DevOps: Docker, Kubernetes, Jenkins, CI/CD

Databases: PostgreSQL, MySQL, MongoDB, Redis, IBM Db2, BigQuery

Observability & Monitoring: Prometheus, Grafana, Graylog

Engineering: Data Structures & Algorithms, Object-Oriented Design, Maven, Ant, Git

Operating Systems: Linux, Ubuntu, CentOS, Rocky Linux, z/OS

PROFESSIONAL EXPERIENCE

IBM India Pvt Ltd, Bengaluru, INDIA — *Senior Staff System Engineer* | May 2024 – (present)

Crypto Discovery and Inventory Application

- Led the **end-to-end backend architecture, development, and deployment** of the ZCDI platform, driving scalable, reliable, and maintainable service architecture.
- Designed and implemented Apache Kafka-based asynchronous communication between internal microservices, using producers, consumers, topics, consumer groups, and partitions to enable decoupled, event-driven service integration and scalable message processing.
- Designed service integration patterns using **microservices and REST APIs**, supporting scalable communication across backend components.
- Led implementation of **Keycloak-based authentication and authorization**, strengthening identity, access control, and application security.
- Directed backend engineering activities, including **architecture decisions, technical design, development practices, code reviews, and engineering standards**.

- Established and managed **Alembic database migration strategies**, enabling controlled and versioned database schema evolution across environments.
- Collaborated with cross-functional engineering teams to define technical solutions, resolve integration challenges, and align architecture with business requirements.
- Mentored engineers and conducted technical reviews, improving engineering quality and promoting scalable development practices.

REST API Test Engine

- Designed and developed a reusable **backend functional testing framework** covering APIs, database interactions, and business logic.
- Integrated automated regression testing into **CI/CD pipelines**, improving release confidence and reducing manual testing effort.
- Built modular and parameterized test components to improve test scalability, maintainability, and reuse.

Nuvepro Technologies Pvt Ltd, Bengaluru, INDIA — *Principal Software Engineer* | Jan 2021 – April 2024, 3.3 Yrs.

- Led a **5-member engineering team** responsible for backend middleware development using Java, PostgreSQL, Spring Boot, and cloud technologies.
- Architected **Nuvelink V2** using Spring Boot microservices, transforming a monolithic middleware platform into a scalable and maintainable microservice architecture.
- Designed cloud cost-calculation and reporting capabilities across **AWS, Azure, and GCP**, helping identify cost leakages and improve revenue visibility.
- Developed a centralized **cross-microservice log analysis solution** to simplify production troubleshooting and accelerate root-cause analysis.
- Led production modernization initiatives including **Java 8 → Java 11**, Ant → Maven, and database platform migration.
- Conducted requirements analysis, feasibility studies, technical design, and solution architecture alignment across engineering teams.
- Mentored engineers and contributed to architecture, code reviews, and engineering best practices.

High Peak Software, Bengaluru, INDIA — *Software Engineer* | July 2018 – Jan 2021, 3.6 Yrs.

- Developed FIU Connect, an integrated platform simplifying access to Multiple Account Aggregator (AA) using Spring Boot and MongoDB.
- Implemented Email Engagement Engine, automating paperwork delivery, tracking responses, and generating daily activity reports, reducing errors, and increasing revenue.
- Engine for parsing invoices from emails, supporting HTML, PDF, Excel, Doc, Images, and email bodies using OCR and Google Vision.
- Campaign Management System allows vendors to create campaigns based on geo-location, specialty, and category using Spring Boot, MySQL, and Redis.

CERTIFICATIONS

- **Postgraduate Degree in Artificial Intelligence and Machine Learning- Online** | Jan 2023 – Dec 2023, Texas McCombs School of Business
- Master Microservices with Spring Boot and Spring Cloud – Udemy Issued My 2022

ACHIEVEMENTS

- Four-Time Employee of the Month | Nuvepro Technologies
 - Demonstrated consistent excellence and dedication, earning the Employee of the Month recognition four times during my tenure at Nuvepro Technologies.
 - Recognized for outstanding contributions, leadership, and unwavering commitment to achieving team and organizational goals.

ASK ME ABOUT – Microservices, Development and Deployment, Cloud Solutions, REST API integration, NLP, and Computer Vision.
